25X1

II. Burma rice problem is this:

- A. Government has 800,000 tons 1953 rice.
- B. Exportable surplus 1954 crop estimated 1,500,000.
- C. Export commitments 1954 only 600,000 so far.
- D. Rice piling up on farms, speculators paying less than legal minimum price.
- E. Farmers cash income comes once a year; their present income doesn't meet debts incurred earlier on basis fixed prices.

III. Burmese government worried

- A. Fear loss peasant political support and possibility scattered riots.
- B. Communist armed activity and influence among peasants will probably increase but government overthrow unlikely.
- C. Plans strong measures against Communist agitation.
- D. But refuses cut export prices *as Social Security Scheme had to rise price* which could solve rice problem.
- E. Seeking solution by negotiating with Moscow and Peiping for sales.

Rangoon price \$168.00 long ton
[generally estimated could move at
40% discount]-

DeThon - wheat + rice -
